DATE: January 22, 2024, 9:15 AM
SUBJECT: Urgent - Packaging Defect Batch LOR-2024-W15

Dear Quality Team,

I am writing to report a packaging issue we discovered this morning during inventory check.

PRODUCT: Loratadine Tablets 10mg
BATCH: LOR-2024-W15
MFG DATE: 01/15/2024
EXP DATE: 01/15/2027

We received a shipment yesterday (January 21, 2024) containing 20 bottles of Loratadine 10mg tablets. Upon inspection,

SPECIFIC ISSUES OBSERVED:
Caps can be removed without the push-and-turn action
Locking tabs appear misaligned or damaged
Affects 25% of the shipment (5 out of 20 bottles)

This is a serious safety concern as the child-resistant feature is non-functional. We cannot stock or sell this product.

All 5 defective bottles are being held in our quarantine area. We have not sold any product from this batch.

We need:
1. Immediate replacement of the 5 defective bottles
2. Confirmation that other shipments of this batch are not affected
3. Investigation into cap supplier or assembly process

Customer Info:
Jackson Williams, RPh
Store Manager, Central Pharmacy
Phone: (555) 456-7890

Please advise on return procedures and timeline for replacement.

Regards,
Jackson Williams
